## Purse Hook

When you're out at your favorite restaurant and you don't have a place to put your purse, what do you do? You don't want to put it on the floor because it's filthy with millions of little bacteria waiting to come home with you and you don't want to put it on the back of your chair because someone might steal it. Placing it on your lap is completely out of the question because it's uncomfortable.

Thankfully, there's Purse Hook, an innovative spin on the classic purse hook from the 1950's. Purse Hook is a handy accessory that is travel-size, functional, and hip. It can keep anything and everything off the floor including diaper bags, shopping bags, umbrellas, men's hats, jackets, sunglasses, and more. Purse Hook can hold up to 35 pounds, making it one of the most durable hooks on the market. For more information, be sure to browse [www.pursehook.net](http://www.pursehook.net).
